DETAILED ACTION

Claims 5-11 are rejected under 35 U.S.C. 251 as being improperly broadened in a reissue application since the declaration has not been signed by the inventors. A claim is broader in scope than the original claims if it contains within its scope any conceivable product or process which would have infringed the original patent. A claim is broadened if it is broader in any one respect even though it may be narrower in other respects.

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The declaration states merely that the patent is defective since it's claims are too narrow, and that the new claims are of a scope to which they are entitled; i.e. a loading unit including a cutting member. First, the patented claims include a cutting member, so therefore the statement is not fully understood. Further, the statement lacks sufficient specific detail as to how the new claims differ in scope; i.e. what features of the patented claims render the scope to be too specific, how the new claims are more narrow, what the omissions or differences exist between the new and patented claims.

Claims 1-11 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Claims 1-11 are allowable over the art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bolanos et al. '644 and Bolanos et al. '353 disclose surgical staplers having cutters.
